## NEO PAINTS

NEOPAINTS is an ISO 9001-2015 & ISO 14001 -2015 certified company. Since inception in 1978 initially for the manufacture of MS Barrels the company spearheaded by its **founder Mr. Aziz Khan** has marched ahead aggressively with various addition to its business portfolio.

Barrel to LDPE & PP Liner bags to Paints & Synthetic Resins followed by Insulating Varnishes & Building materials, today brand NEO has become a recognized & trusted **Multi Product Company**.

Neo also has proved to be a good manufacturing organization with expertise in Product Development / Quality Consistency / Sourcing & Inventory Management making it a mass outsourcing supplier to big corporates.

NEOPAINTS ('aka) Neo Pack Plast (India) Pvt. Ltd. has 2 Production Facilities, one strategically located in central Vapi, Gujarat & another in the union territory of Daman (UT).

## *Value addition to our every customer projects - testimonial*

I have been selling different brands of Paints and Construction chemicals for the last decade. Got associated with NEO as their distributor and now I take all products from them. Actually, I have put all eggs in one basket now. NEO has such a big range whether it is Paints, Construction Chemicals & Varnish. 3 cheers to NEO.

## *Because quality always matters*

At NEO, Quality is given top most priority & un-compromised. We achieve Cent Percent quality compliance by,

- Choosing the best RAW MATERIAL
- Use of best and updated technology for all products
- Optimum use of each constituent of the product
- Strict adherence to manufacturing process & standard
- Zero tolerance in the testing of output

cut out

**Vision**

To be a leading provider of complete coating solutions. To manufacture environment-friendly products. Operations expansion.

**Mission**

To exceed customers satisfaction across various sectors through our quality products.

**Core Values**

Our values reflect in our strong customer focus and commitment to over-deliver customers' expectations.

**Philosophy**

We at Neo, focus on developing high-quality products to be delivered at a competitive prices. We believe in upgrading skills & technology to provide unmatched customer service.

cut out

## Environment Friendly

Since its inception, Neo's greatest endeavour has been to promote and develop environment-friendly low VOC products that have the least risk factors involved and are safe for customer use. Neo has also ventured into the manufacture of Green Chemistry products using Water-Based Nano Technology as a part of its pursuit to become user-friendly & eco-friendly.

## Reach/ Achievements

Over the years, our esteemed clientele across several countries vouch for our quality products and supreme services. Neo has left no stone unturned in expanding its reach to the nooks and crannies of the country. Being a quality-driven company, Neo's products are preferred across various architectural and industrial segments, be it infra, pharmaceutical, auto, or any other sector in need of coating solutions.

### **In a short time, Neo has achieved many targets that include:**

- Increase in the market share
- Customer satisfaction beyond expectations
- Successfully widened its coating product portfolio
- Increase in the production capacity to cater high demand and supply
- Overseas business expansion

## Research & Development

For any product to succeed, it needs the utmost support from all major divisions of an organization be it the R&D, Marketing or the Manufacturing division. Neo works in perfect harmony with all its divisions in order to develop innovative products that are hallmarks of quality and credibility.

Neo has a separate state-of-art R&D division that is well-equipped with global standard machinery. Its trained professionals work round the clock in developing new and innovative products that brim with quality depending on the clientele needs.

## Super Infrastructure

Strategically located in central Vapi and Daman (UT), are Neo's state-of-art manufacturing unit cum Corporate office. This Plant is synonymous with power-driven technology and services that are designed to excel in product processes. Our other branches are located in Mumbai, Pune, Delhi, Mohali, Ahmedabad, Kerala, Tamilnadu, Andhra, Telengana, Rajasthan, Uttarakhand, M.P., Chattisgarh, U.P. and Orissa. We have an overseas branch located in Hongkong.

### Infrastructure includes:

- Highly experienced and skilled manpower
- Separate manufacturing set-up for each brand
- Spacious godowns for storing Raw materials and Finished goods
- State-of-art Machinery
- A Well-Equipped Laboratory
- Hi-tech Corporate Office
- Comprehensive Research and Development Center
- A Quality Control Lab for Testing Raw materials and Finished products

## Testing Facility

**At NEO products go through 3 stage testing.**

1. All raw materials & packing materials are tested as per strict standards.
2. All production batches have strict in-process testing for key properties.
3. Finished goods are tested for all parameters as per standard specification.

Neo testing facility is equipped for testing most properties in-house. "ZERO TOLERANCE" is the scale of perfection & dedication of our Testing team & Quality Assurance department.

The Testing & Quality Assurance team is very skilled-led by highly qualified technicians & polymer science experts.

## Decorative Products

AESTHETICALLY PERFECT  
DECORATIVE PAINTS & PRIMERS

**NEOSILK | NEOPRIDE | NEOGLORY | NEOCHAMP**  
MAKES YOUR SURROUNDING BEAUTIFUL

NEO's Paint products are high-quality acrylic emulsion paint for exterior & interior walls. They provide a luxurious finish in addition to excellent weather & high scrub resistance. Products are specially formulated on Nano Technology to withstand complex climates. They offer resistance to algae, microbial & fungal growth on cemented walls, asbestos-cement sheeting, gypsum & all concrete/brickworks. It has excellent UV resistance. Internal paints offer a unique Anti Bacterial Shield, offer protection against tough stains and are easy to clean.

Neo's Primer products are made of high-quality Plastic emulsion ideal as an undercoat matt finish protective coating for newly plastered or previously painted walls. The cement primer is an undercoat to be applied after preparation of the surface and before applying of topcoats.

Neo's Distemper Products are thinnable acrylic coating meant for Application on internal cement plastered wall of house.

Application of all products is done by brush/roller/spray on surfaces. Appropriate surface preparation like application of putty, primer needs to be done to get optimum finishing.

## Waterproofing Coating

**MOST RELIABLE - HIGHLY DURABLE  
LIQUID MEMBRANE WATERPROOFING SYSTEM**

### **NEOPROOF NO ENTRY TO WATER**

Specially designed, high-quality, cold applied, pollution-free liquid waterproofing membrane coating products. Being flexible accommodates expansion/contraction in underlying surfaces. Suitable for both horizontal and vertical applications. Available in White / Grey / Black & other custom colors on request.

**Application Area:** Waterproofing of roofs / balconies/ chajjas/ parapet walls / basement/ sunk portions / decks/ metal surfaces etc.. Useful as a Decorative Cum Waterproof Coating for External Walls. Ideal for swimming pools, terrace garden as a sandwich membrane.

**Method of Application:** Clean surfaces free of dirt, gravel, dust, and oil. Ensure the surface is dry and crack-free. Apply primer & follow it with multiple coats at right angles to each other. Products are water-dilutable. Coverage and DFT depend on the surface condition and product selection. (refer to TDS for details). Allow drying of 6-8 hours for each coat before the next coat. The use of mesh reinforcement on wet first coat is suggested for better results. Can be applied by brush, rollers, sprayer.

**Storage & Shelf Life:** Keep in a cool place away from direct sunlight & high temperature. Shelf life is 12 months from the Mfg date in an unopened container.

## Heat Insulation And Energy Saving Coating

COOLS - DECORATES - WATERPROOFS (3 IN 1)  
LIQUID MEMBRANE THERMAL INSULATION PRODUCTS

### SUNBLOK CHILL-CHILL COATING

Sunblok is a one-part, cold applied durable membrane coating based on Synthetic resin / Polymer either stand-alone or in combination along with special additives to enhance solar reflectivity & weather durability. The coating bonds excellently to most building materials. The product has a high SRI rating and gives around 8-10 deg C difference in ambient temperature in interiors. Available in White & lighter shades.

**Application Area:** For insulation & waterproofing of roof slabs / terraces / balconies/ chajjas/ parapet walls / concrete walls/ exterior masonry surfaces etc..

**Method of Application:** Prepare surfaces clean, free of dirt, gravel, oil, grease, etc. Ensure surfaces are dry, well compacted, cured & Crack free. Apply primer & follow it with 2 coats at right angles to each other. Add additional coats to build higher DFT Products that are water-dilutable(refer to TDS for details). Allow drying of 6-8 hours between coats and post-application allow for 7 days for complete curing. Coating yields better results for DFT > 800 microns. Can be applied by brush, rollers, airless spray equipment. The coated surface needs to be maintained periodically to get optimum benefits.

**Storage & Shelf Life:** Keep in a cool place away from direct sunlight & high temperature. Shelf life is 12 months from the Mfg date in an unopened container.

## Heat Insulation And Energy Saving Coating

EFFICIENT & HYGIENIC  
THERMAL INSULATION DUCT COATINGS

### NEOPROOF HVAC COATING

NEOPROOF Thermal Insulation duct coating products are one part, cold applied durable membrane coating based on Synthetic Resins / Polymer either stand-alone or in combination along with special additives to give insulation & vapour barrier. The products are tough, flexible, and possess superior UV resistance. The coating bonds excellently to materials used in HVAC Duct assembly like mineral wool, glass fiber, polystyrene & PU foam.

**Application Area:** Used for coating Internal, External Ducts, ASJ, FRK, FSK jackets & board facings to give a vapour barrier seal at Joints, Laps, and weld pin punctures. Used for sealing pipes, vessel ducting & types of equipment operating between 0°C and ambient temperature. Also used to arrest air erosions from Duct joints.

**Method of Application:** Prepare surfaces clean, free of dirt, gravel, oil, grease, etc. Ensure surfaces are dry, well compacted, cured & Crack free. Can be applied by brush, rollers, airless spray equipment. Apply a tack coat @ 4-6 m<sup>2</sup> per litre and follow it up with embedding of selected lagging fabric onto the wet coat. Apply 2 finish coats @ 5-6 m<sup>2</sup> per litre. Allow drying for 6-8 hours for each coat and 72 hours after completion.

**Storage & Shelf Life:** Keep in a cool place away from direct sunlight & high temperature. Shelf life is 12 months from the Mfg date in an unopened container.

## Bonding Agents, Admixture & Plasticizer

EFFICIENT - STRONG

ADDITIVES & POLYMER FOR CEMENT COMPOSITIONS

### NEocreTE

STRENGTHENS CEMENT

**Description:** Expansive product range consisting of Integral Waterproofing Additives/ Bonding Agents / Admixtures & plasticizers / Accelerators that are used as an additive for modified portland cement composition. Finds use in building industry as an adhesive/additive to concrete & plasters / as universal bonding agent/as a cementitious coating. These additives improve physical strength, offer good adhesion to old concrete, masonry, brick, etc. Admixture & Plasticizer products offer good plasticizing properties, make concrete cohesive & prevents segregation. When added to the wet concrete or mortar, fills up capillaries to make it waterproof. Enhances workability, reduces water consumption, improves the performance of hardened concrete.

**Application Area:** Integral Waterproofing additives are used as an efficient cement tonic. Bonding Agents are used for general concrete repair work, for rendering & profiling of vertical, horizontal & overhead applications. As a waterproof sealer for tanks. For strong & non-permeable bonding of old & new concrete. For repairing of cracks. Ideal for thin sets, terrazzo, stucco & bonding slurries. Admixtures & Plasticizers are ideal for waterproofing concrete mortar constructions like tanks, reservoirs, external & internal plasters, bathroom walls, etc. For making self-compacting, high strength, high workability, hot weather & ready-mix concrete.

**Method of Application:** Clean surfaces free of dirt, gravel, dust, and oil. Wet surface before application, make sure that it is not damp. Mix as per specified mix dosage specified in TDS specific to applications. Can be applied by brush, spatula/trough. Add product to water prescribed to be added to cement compositions.

**Storage & Shelf Life:** Keep in a cool place away from direct sunlight & high temperature. Shelf life is 12 months from the Mfg date in an unopened container.

## Floor Coating

**RICH LOOKING & STERILE  
EPOXY/PU FLOORING SOLUTION**

**NEOFLOOR P | NEOFLOOR S | NEOFLOOR SLT  
NEW GENERATION FLOORING**

NEOFLOOR are tough, hard-wearing, chemical, and abrasion-resistant coatings that help the surface to last long without compromising any of the properties of the concrete floor. Based on a solvent-less, zero VOC two-component Epoxy/PU System, NEOFLOOR provides a monolithic, smooth, non-porous, hygienic coating that is easy to clean and maintain. It is available in a wide range of colors and has sufficient strength to withstand industrial traffic with nylon/rubber wheels. It offers improved performance while maintaining ease of application. NEOFLOOR is designed for all concrete surfaces (old/new).

### **Features:**

- Glossy, Satin / Matt finish in customized colors
- Solvent-less & Odour free coating
- Excellent resistance to Chemicals & Abrasion
- Anti bacterial / Anti microbial
- Self-leveling in nature
- Moisture tolerant & Non Staining
- Enhanced Adhesion
- Anti Static

## Industrial Paints - Premium

**TOUGH & PROTECTIVE  
EPOXY & POLYURETHANE PAINTS & PRIMERS**

**NEOGUARD**  
EPOXY PRIMERS & FINISH PAINTS

**NEOSHIELD**  
PU PRIMERS & FINISH PAINTS

NEOGUARD Epoxy Paints are 'Epoxy' based topcoats offering good resistance to Acid and Alkali. These products are designed to offer superior corrosion protection to Ferrous and nonferrous substrates. The product has got excellent adhesion strength and also offers a balanced aesthetic and corrosion protection. NEOGUARD epoxy Paints also show good Chemical & Salt Resistance. Neo Guard Epoxy Paints are available in High Glossy / Semi-Glossy varieties. Special products with accelerated curing speed are also available.

NEOSHIELD PU Paints are 2 part polyurethane-based topcoats offering good resistance to UV & Corrosive chemicals. These products are designed to offer the best gloss retention property. The product has got excellent adhesion strength and also offers a balanced aesthetic and corrosion protection. NEOSHIELD PU Paints are available in Clear / High Glossy / Semi-Glossy varieties. These products cure at Room temperature and provide excellent flexibility, toughness, good abrasion, chemical & UV resistance.

Neo has an extensive range of primers based on Epoxy / PU / Synthetic resin. NEO PRIME GUARD grades are quality Epoxy-based primers while NEO SHIELD PRIME grades are PU primers. They exhibit excellent adhesion and anti-corrosive properties. Neo offers multiple grades loaded with special additives, nano tech, anti-corrosive pigments for meeting specific requirements.

## Auto Refinish Paints

### ULTRA GLOSS & LONG LASTING AUTOMOTIVE REFINISH PAINTING SYSTEM

#### NEOSHIELD | ZOOM - AUTO ULTIMATE TOPCOAT FINISHES FOR AUTO SEGMENTS

**NEOSHIELD - AUTO:** It is a premium polyurethane 2 pack paint system specially designed & formulated for Automotive Refinish Coating. The product coating has excellent UV resistance. It is recommended as a Tru coat for OEMs and auto ancillaries. It offers enhanced durability, opacity & gives an Ultra High Gloss finish

**ZOOM:** A Single pack, Air drying, Alkyd based automotive finishing paint. A quick-drying paint characterized by its Supreme Gloss & enhanced gloss retention coat is the best choice for coating on Auto Vehicles, Auto ancillary parts, chassis of automotive body parts, the outer side of the tank, etc.

It is suitable for application on metallic surfaces, wood coatings, Asbestos sheets, cemented walls & bricks. It offers superb flow & leveling properties as well as forms a tough durable film. In addition to Auto, it finds use in Home appliances like refrigerators, etc. & industrial machinery. Zoom is available in Solid Colours & Metallic tinting systems.

## Enamel Paints & Primers

### SUPER GLOSS & LONG LIFE SYNTHETIC ENAMEL PAINTS

#### **IGLOW | X2 | NEOPRIME** TIPTOP FACELIFT TO YOUR INTERIORS

NEO Enamel Paints are based on the alkyd resins which gives tough films with gloss retention and non yellowing properties.

Products are carefully designed keeping the pigment volume concentration to get optimum gloss, washability, adhesion, and durability, The product dries at room temperature by oxidation and polymerization.

Neo Synthetic Enamels are used on various substrates like wood, metal furniture, train coaches, automobiles industries, etc.

NEO Enamel Paint and Primer Products are as below:

- **I GLOW** - Super Gloss Premium Enamel
- **X2** - High Gloss Synthetic Enamel
- **NEOPRIME** - Professional Primer Series

NEOPRIME primer products are solvent based, high-quality undercoat applied after preparation of the surface and before application of topcoats. Neoprime offer superior adhesion and corrosion resistance.

## Marine Paints

TECHNICALLY ADVANCED-AESTHETICALLY PLEASANT  
ANTI FOULING | ANTI CORROSIVE | DRY DOCK COATINGS

### HIGH SEAS

ANTI FOULING | ANTI CORROSIVE | DRY DOCK COATINGS

Neo's High Seas product range are proven and advanced marine coating that offer enhanced corrosion inhibition when applied to surfaces exposed to or immersed in fresh and/or salt water. They are used with boats, ships, ferries and other watercraft, as well as with marine structures such as offshore oil rigs.

Our marine coating range includes epoxy based compounds, epoxy primers and sealers, wood finishing systems & Anti-fouling coatings etc. Depending on type of substrates & performance parameters Neo has specially designed grades to give customer satisfaction and value for money

### OUR KEY FEATURES

- Excellent protection from corrosion
- Biocide Free & environmentally friendly
- Suits both offshore & onshore applications
- Compatible to most substrates
- Adds to life of applied substrates

## Wood Coating

CLASSIC TOUCH - BEAUTIFUL FOREVER

**PROFESSIONAL WOOD SEALER/COATING/STAINER SYSTEM**

### WOODPRO

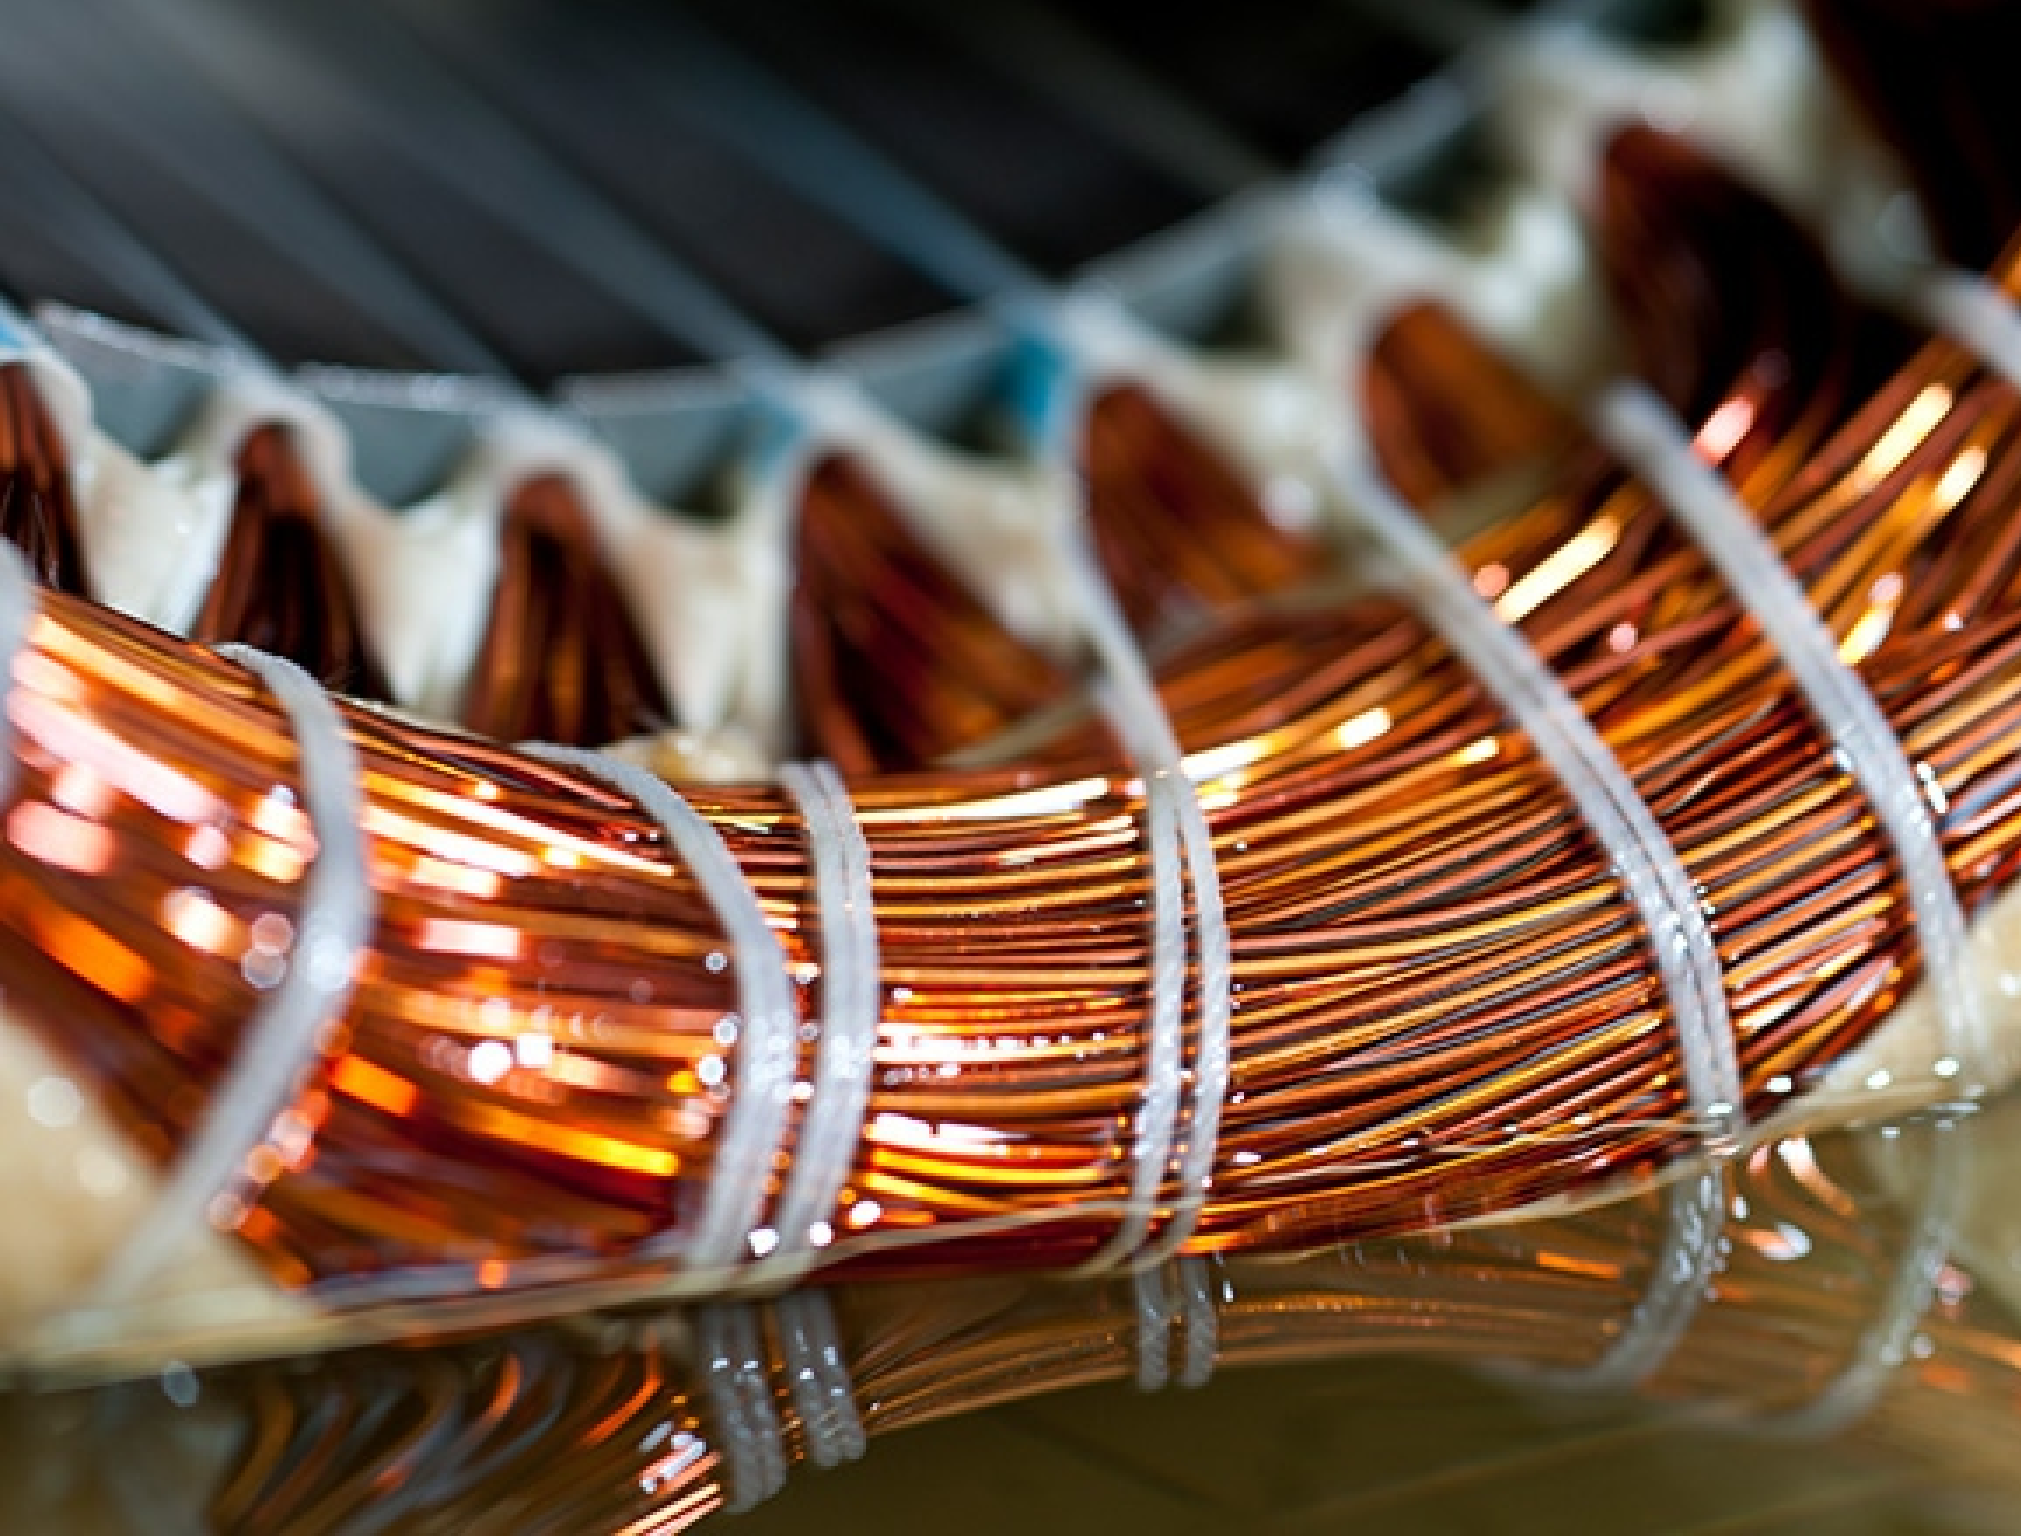

PROFESSIONAL TOUCH FOR YOUR WOODEN FIXTURES

Neo's WOODPRO Series of products caters to the wood coating needs of diverse users and consumers. The product portfolio ranges from basic wood polishing need to advanced wood coating solutions. Our range of wood coating consists of specific grades for each process like preparation of wood, sealing, tinting, and finish coats.

- WOODPRO wood coatings consist of wood fillers, sanding sealer, wood stainer, Melamine finish coats, and PU topcoats in 1K & 2K system
- Available for both exterior and interior application
- Budget-friendly & durable coating for customer

WOODPRO also brings a customized top-class range of products to coating needs for premium furniture. This range of finishes, colors, textures gives customers great choice for enhancing the beauty of furniture & at the same time making it durable and resistant to external factors.

## Insulating Varnish

HIGH QUALITY  
ELECTRICAL INSULATION VARNISH

### NEOVAR REWINDER'S CHOICE

Superior range of modified polymer based Insulating varnish products specially formulated to give a high degree of insulation. They protect the electrical machine from various Thermal/Mechanical/Chemical stress in addition to meeting insulation parameters As such its usage enhances the life and safety of electrical machines All our products are tested and approved by ERDA.

**Application areas:** Use for applications in transformer, chokes, coils, all kinds of motor, fans, circuit board, insulation tapes, glass laminates, AC/DC/ motor, generator, armature etc.

**Usage:** Applied by dipping, brushing and vacuum impregnation.

**Shelf life:** 1 year from date of manufacture in original sealed container at Room Temperature.

### OUR INSULATING VARNISH RANGE

- B CLASS AIR DRYING & BAKING VARNISH
- F CLASS AIR DRYING & BAKING VARNISH
- B CLASS FINISHING VARNISH
- H CLASS BAKING VARNISH
- EPOXY VARNISH
- SLEEVE VARNISH

## Resin

RELIABLE & STRONG

**RAW MATERIAL FOR PAINT & INK MANUFACTURING**

**NEOREZ**

**MAKES QUALITY BETTER**

NEOREZ Resin is a backward integration product for Paint & Ink manufacture with a diverse range of products and the capability to customize properties at the basic RM level makes the offering special. NEOREZ improves the ultimate paint and ink quality.

**Our Range**

Alkyd Resin | Chainstop Resin | Acrylic Resin (Two pack poly urethane)  
Acrylic Resin ( Thermosetting ) | Acrylated Alkyd Resin | Epoxy Ester  
Amino Resin | Hammertone Resin | Double Distilled Cardinol Resin  
C.N.S.L. Resin | Hard Resin |

## Maintenance Spray

REVOLUTIONARY & HANDY

**5 IN 1 SPRAY**

**NIS 40**

DISPLACES MOISTURE-LUBRICATES-PENETRATES-PROTECTS-CLEANS

NIS 40 is multi utility maintenance oil used for versatile applications mechanical or electrical. Ideally designed for disintegration of rust & corrosion. As a rust preventive it also exhibits water displacement properties & excellent lubricating strength. It is also a good cleaner of all substrates of dirt/grease/oil. It exhibits good corrosion resistance and lubricating properties by leaving a continuous molecular film that never dry or brittle.

- Cleans sticker/adhesive marks
- Lubricates sliding door channels
- Removes choking In gas burner
- Stops squeaks in chairs, fans, cupboard door
- Helps hinges in easy opening of rusted bolts and nuts
- Prevents corrosion in saline atmosphere
- Used as a rust preventive oil for costly metal parts and many more applications.

## Rust Remover

DEPENDABLE & CONVENIENT

**3 IN 1 ANTI RUST LIQUID**

**RUST O KILL**

REMOVES-CONVERTS-DEGREASES

**RUST-O-KILL** is a single component adduct of polar solvents and organic acids specially formulated to remove rust, convert rust into a non-corrosive coating and additionally act as an active oil & degreasing agent. It performs actions efficiently and hence becomes a handy product in hands of all maintenance engineers/mechanics. Finds use in all industries/building & construction / automotive repair service centre.

### APPLICATION AREA

- Apply without water dilution on surface badly rusted and with dilution if the substrates are soft rusted
- Apply with brush or dry cloth /sponge or spray gun on the rusted surface. Wait for 5 to 10 minutes & then rub the surface with Polish Paper/Sand Paper or Emery cloth till the bare metal is seen.
- Now, wipe out the loose particles with a dry cloth, followed by a water wet cloth then again wipe out with a dry cloth. Apply primer or paint as required.
- Use on the surfaces where dust /dirt or oil & grease are heavily deposited & need to be cleaned for painting.

## Tile Protek

### PROTECTIVE TILE COATING

Neo Tile Protek is a unique, water-based high-performance coating for non-porous baked clay tiles, Kerala bricks, and roof tiles.

#### Features

- Strong water repellency
- High washability
- Anti-algal and Anti-fungal
- Long lasting performance
- Rich sheen

#### Benefits

- Excellent property to repel water.
- Excellent resistance against the growth of fungal and algal organisms.
- The Tile Protek film bonds better to tiles, can bridge cracks, and is tough.
- Tile Protek uses cutting-edge technology to deliver long-lasting performance even in the harshest tropical environments.

## Metalika

### METALLIC EMULSION

Neo METALIKA is a water based metallic emulsion paints designed to perform on both interior and exterior walls. It can also be used on Metal and Wood surface; it gives a sparkling metallic texture on the walls.

#### Features

- High Sheen
- Interior & Exterior durable
- Excellent glitters

#### Recommended Surface

Masonry surface, Concrete, Plastered walls, etc. wood and metal(After priming the appropriate primer).

## Textura

### TEXTURE COATING

- Hides surface cracks and undulations.
- When applied as a system and topped with the recommended top coat, it resists the growth of algae and fungi.
- Releases moisture from the paint surface and the substrate at the same time.
- Excellent adhesion and UV resistance. Protects the plaster from rain driven by wind, extending its lifespan.

#### Features

- Excellent durability
- Long lasting
- Tough finish

#### Description

Textura is a rough and tough texture coating made of acrylic emulsion that can be used on both interior and exterior wall surfaces. It gives walls a beautiful, unique design and can also be used to protect them for a long time.

# green CHEMISTRY

## Green Chemistry

### Eco-friendly protective coatings with Nano technology

Green Chemistry is the design of chemical products and processes that lessen or wipe out the generation of dangerous substances. Green chemistry decreases pollution at its source by limiting or eliminating the risks of Chemical feedstock, reagents, solvents, and Chemical products.

With consistently expanding ecological awareness, Neo Paints is glad to take on the responsibility of being environment friendly. Green Chemistry paint is not just more manageable, it likewise has its own look and feel. It is a paint manufactured with water as the solvent. With the use of Advanced Nano technology, Green Chemistry Paint is prepared from water-based resin and curing agent for the protection of the metal components against degradation due to moisture, salt spray, corrosion, oxidation, or exposure to various weather conditions and industrial chemicals. Its Zero level of Volatile Organic Compound (VOC) made it a perfect paint after the new VOC guidelines. This makes them nature-friendly paint with close to zero harmful effects on your well-being.

Neo Paints devotes its earnest attempts, at the present time, to safeguard and preserve Mother Nature to serve our future generations.

## Colorant Range

EASE OF PRODUCTION & QUALITY CONTROL

### NEOTINT

UCOL | ACOL | ICOL

### UCOL

Ucol-universal colorant is a concentrated dispersion of colour pigment that is used to tint a base paint. A line of well-designed universal colorants can be used for all types of solvent-based paints. Modern universal colorants are solvent-free. These colorants are generally viable with different modern resin systems like Acrylic, Polyurethane, Alkyd, Epoxy, Nitrocellulose, MF, Saturated Polyester and many others.

### ACOL

Acol- Aqueous Pastes are explicitly intended for coloring in all type of water-based applications. These aqueous pastes are impeccably fit to a wide scope of uses and industries including inks, paper, textiles, latexes and more. They are extremely compatible with different types of water-based emulsion paints.

### ICOL

Icol- Industrial colorants are genuinely adaptable with a wide scope of utilizations including General Industrial Coatings, Protective and Maintenance Coatings, Wood Coatings, Automotive Refinish Systems, Floor Coatings, Marine Coatings and Aerosol Paints. Icol comes for Alkyd system, Epoxy system and PU system respectively.

## Tile Adhesive & Grouts

TILE JOINTS & SEALING SYSTEM

### NEOFIX

MAKES PERFECT JOINTS

**NEOFIX** offers best fit products suiting to classic Tile Affixing, Joints & Sealing. Product range includes

- TILE ADHESIVES
- TILE GROUTS

**NEOFIX TA 1000** - This is a single pack Tile Adhesives based on Polymer modified Cementitious mixture. It offers excellent resistance to complete immersion & adhesion to all building material. Ideally suitable for ceramic, mosaic tile bonding. Coverage: 13-14 kg/m<sup>2</sup> when applied by 7 mm notched trowel.

**NEOFIX TA 1005** - Ready to use tile fixing paste that facilitates error free working that eliminates common tile fixing problems noticed with ageing.

**NEOFIX TA 2000** - A thixotropic solventless, epoxy resin based attractive tile joint grout characterised by its low odour & high resistance to water, weathering & wide range of industrial chemicals. Available in wide colour range to match tiling colours. Ideal for bathrooms / Swimming pools/ factories/ hospital where a stain free cleanable joint is required.

WATERPROOFING

HEATPROOFING

Application Services

NEO SUPPLY & APPLY DIVISION  
MANUFACTURER'S OWN APPLICATION TEAM

WATERPROOFING | HEATPROOFING | EPOXY FLOORING  
INDUSTRIAL SERVICES | STRUCTURAL REHABILITATION  
PAINTING & CHEMICAL TREATMENT

Neo focuses on specialized services of the Painting & Waterproofing requirements of each customer. We have specialized team specific to customers to understand their problems, suggest solution and do the actual job under ONE ROOF.

Our product application team consisting of highly qualified & competent workforce can efficiently take care of your need giving you a marked difference of execution in comparison to miscellaneous contractors.

NEO PAINT offers exclusive services as below:

- Online product briefing
- Demonstration / Sampling
- After sales service & maintenance
- Site visits / Inspection
- Complete work supervision
